

5x4 Setup Instructions

Example ONLY

From each satellite LNBFs you need to run 2 feeds
(13v + 18v)

In this example you will be taking 2 SATs (110 + 119) to 4 FTA receivers

SAT 1 = A+B (110 W)

SAT 2 = C+D (119 W)

SAT	22KHZ	DISEQC
SAT 1 = A+B	On	1
SAT 2 = C+D	Off	1

For each sat you will following in your FTA box
(110 + 119)

OPTION	SAT	SAT
	A+B	C+D
	110	119
DISEQC	1	1
22KHZ	On	Off

All 4 receivers to have 2 satellites must be FTA as we have NOT tested this for NON-FTA boxes. Also you can NOT use DISHPRO LNBFs.
